

1260110 3.7V 10000mAh Lipo (Lithium Polymer) Rechargeable Battery

slug: 1260110-3.7V-10000mAh-lipo-lithium-polymer-rechargeable-battery

TECHNICAL SPECIFICATIONS & SUMMARY

[LiPo Cell] 3.7V 10000mAh Lithium Polymer (Li-Po) Rechargeable Battery - Model 1260110 Being a Lithium Polymer (Li-Po) rechargeable battery, this is a high-capacity, lightweight battery designed for applications where compact size, high energy density and good capacity-to-weight ratio are important. This 3.7V 10000mAh Li-Po battery uses a solid polymer electrolyte and is suitable for DIY and commercial applications such as power banks, GPS devices, MP3 players, FM radios, Bluetooth speakers, IoT devices and other portable electronics. This battery is Model 1260110, Grade A quality, certified and designed for high-performance rechargeable applications. Key Features High-capacity 10000mAh rechargeable Li-Po battery 3.7V nominal voltage Maximum charging voltage 4.2V Lightweight and sleek design High specific energy and energy density Excellent capacity-to-weight ratio Flexible form factor Compact size for portable applications Grade A quality rechargeable cell Suitable for DIY and commercial applications Useful for portable electronics and battery-powered projects Technical
