TECHNICAL SPECIFICATIONS & SUMMARY

[Lithium Battery Cell] The 18650 3.7V 2000mAh Lithium-Ion Rechargeable Cell is a high-performance cylindrical lithium battery designed for reliable and long-lasting power delivery. With a nominal voltage of 3.7V and a capacity of 2000mAh, this cell is ideal for building DIY battery packs, power banks, backup batteries, flashlights, robotics systems, and portable electronic devices. Manufactured using high-quality lithium-ion chemistry, this rechargeable cell offers stable discharge, low internal resistance, and excellent cycle life. It can be connected in series or parallel configurations to create higher voltage or higher capacity battery packs for various applications. The standard 18650 size format makes it compatible with most battery holders, chargers, and BMS boards. When used with a proper BMS (Battery Management System) and charger, this cell provides safe and efficient performance. KEY FEATURES Nominal Voltage: 3.7V Capacity: 2000mAh Rechargeable Lithium-Ion Chemistry Standard 18650 Size - wide compatibility Long cycle life & stable output Low self-discharge rate Ideal
