TECHNICAL SPECIFICATIONS & SUMMARY

[Lithium Battery Holder] 26650 Battery Holder / Battery Spacer 2x1 - 26.3mm Bore Diameter The 26650 Battery Holder / Battery Spacer 2x1 is a cylindrical battery spacer designed to securely arrange 26650 lithium-ion battery cells while building multi-cell battery packs. Made from flame-retardant ABS+PC material, it provides a strong and stable structure while allowing air circulation around the cells. The holder features interlocking slots on the edges, allowing multiple spacers to be joined together to create different battery-pack sizes and configurations. After welding nickel strips, the assembled battery pack can achieve a solid and reliable structure without requiring additional connecting hardware. Key Features Designed for 26650 cylindrical lithium-ion cells 2 x 1 configuration 26.3mm bore diameter Made from flame-retardant ABS+PC material High-temperature resistant construction Crack-resistant design Interlocking slots for connecting multiple spacers Allows flexible battery-pack configurations Provides mechanical support for battery cells Helps maintain proper spacing between
