

500mAh 3.7V Single Cell Rechargeable LiPo Battery (HCY-602530)

Slug: 500mah-3-7v-single-cell-rechargeable-lipo-battery-hcy-602030

TECHNICAL SPECIFICATIONS & SUMMARY

[LiPo Cell] 500mAh Rechargeable 3.7v LiPo Battery The 600mAh Rechargeable 3.7V LiPo Battery is a compact and high-performance power source designed for a wide range of DIY electronics, robotics, and wearable projects. With a nominal voltage of 3.7V and capacity of 500mAh, this 1S lithium polymer battery delivers a reliable and consistent power output for your low-to-medium power applications. Its lightweight and slim profile make it ideal for portable gadgets, RC toys, sensors, and IoT devices that require stable energy without adding bulk. One of the key advantages of this battery is its long-lasting runtime when used with efficient electronics. For example, if a device consumes an average current of just 2mA, the 600mAh capacity allows the battery to run for up to 300 hours (600mAh / 2mA) under ideal conditions. This impressive endurance highlights the battery's suitability for long-duration tasks, especially in energy-conscious designs. With Witty Fox's reputation for quality and durability, this LiPo battery is a dependable choice for both hobbyists and professionals looking for
