TECHNICAL SPECIFICATIONS & SUMMARY

[LiPo Cell] The 803040 3.7V 1000mAh Lithium Polymer Battery is a lightweight and compact rechargeable battery designed for portable electronic devices and embedded applications. With a stable 3.7V nominal voltage and 1000mAh capacity, it provides reliable power for IoT projects, DIY electronics, Bluetooth devices, and wearable gadgets. This LiPo battery features a flat pouch design that allows easy integration into compact devices. The high energy density and stable discharge characteristics make it suitable for applications requiring long-lasting power in a small form factor. The battery can be charged using standard LiPo charging modules and provides dependable performance for hobby electronics and portable systems. Key Features Nominal Voltage 3.7V Capacity 1000mAh Lightweight and compact pouch design Rechargeable Lithium Polymer battery High energy density Low self-discharge rate Stable discharge performance Suitable for portable electronics Technical Specifications Parameter Specification Model 803040 Battery Type Lithium Polymer (LiPo) Nominal
