TECHNICAL SPECIFICATIONS & SUMMARY

[Silicon Wire] The High-Quality 12AWG Silicone Wire 1m (Red) + 1m (Black) pair has a pretty big diameter as compared to the normal 20AWG wire used in RC projects for serving its specific purpose. This wire has low resistance and high current carrying capacity. These are also used in LiPO batteries to deliver power to ESC's. Ideal for your RC project. It is super flexible and soft with a high strand count which means it is great for use in restrictive and compact areas. The wire is the first priority tool for carrying current from one circuit to other while their current carrying capacity is dependent upon the size of the wire. So the High Quality 12AWG Silicone Wire 1m (Red) + 1m (Black) both has the considerable diameter to suit your application. Please find out our more cable and wires. Click here [Wires with the wide variety of silicon wire gauges and colors to suit your applications are available](#) Features : Super Flexible. High Strand Count. Pure Silicone Outer. Cul Standard: 12AWG Material: Tinned Copper Construction AWG: 680/0.8+/- 0.005mm Nominal Voltage: 600V Nominal Temperature: 200

UNIT PRICE (EX. GST)
