TECHNICAL SPECIFICATIONS & SUMMARY

[Lithium Battery Holder] The 18650 Single Lithium Battery Spacer Holder is a high-quality hard plastic separator designed for securely holding a single 18650 lithium-ion battery cell. It helps maintain proper spacing between cells while improving battery pack organization, safety, and assembly efficiency. In addition, the spacer features a precision-molded design that allows easy insertion and removal of battery cells. As a result, it simplifies battery pack construction for both hobbyists and professional users. Because of its durable hard plastic construction, the holder can withstand normal operating temperatures and mechanical stress. Furthermore, it provides better airflow between cells, helping improve heat dissipation in battery pack assemblies. The modular interlocking design allows multiple spacers to be connected together. Therefore, users can easily create custom battery pack configurations such as 2S, 3S, 4S, and larger battery arrangements. This battery spacer is widely used in DIY battery packs, power banks, solar energy storage systems, electric vehicles, UPS systems, and lithium
