

LM358P PDIP-8 High Gain Operational Amplifier

Slug: lm358p-pdip-8-high-gain-operational-amplifier

TECHNICAL SPECIFICATIONS & SUMMARY

[Logic Gates IC] Description These devices consist of two independent, high-gain, frequency-compensated operational amplifiers designed to operate from a single supply over a wide range of voltages. Operation from split supplies also is possible if the difference between the two supplies is 3 V to 32 V, and VCC is at least 1.5 V more positive than the input common-mode voltage. The low supply-current drain is independent of the magnitude of the supply voltage. Note: Product may vary from images shown in terms of brand name according to the availability. Package Includes: 1 x LM358P PDIP-8 High Gain Operational Amplifier
