TECHNICAL SPECIFICATIONS & SUMMARY

[LED/LCD Display Module] If you want to add some visual output to your Arduino projects, you'll need a display. If you need only a little to display, the LCD 16x2 Parallel LCD Display is a quite good solution. This is a Original JHD 16x2 Character LCD Display With Blue Backlight as there are many fake JHD Displays in the Market. This is a great blue backlight LCD display. It is fantastic for Arduino based project. This LCD 16x2 Parallel LCD Display with Blue Backlight is very easy to interface with Arduino or Other Microcontrollers. This is LCD 16x2 Parallel LCD Display that provides a simple and cost-effective solution for adding a 16x2 White on RGB Liquid Crystal Display into your project. The display is 16 character by 2 line display that has a very clear and high contrast white text upon a blue background/backlight. The values shown on the display can be either simple text or numerical values read by the sensors, such as temperature or pressure, or even the number of cycles that the Arduino is performing. For more displays click below, LED/LCD Display   Features : 16
