

XT90 Male Female Connector Pair 90A High Current Battery Connector with Caps

Slug: xt90-male-female-connector-pair-90a-high-current-battery-connector-with-caps

TECHNICAL SPECIFICATIONS & SUMMARY

[Power Connector] The XT90 Connector Pair is a high-current electrical connector designed for demanding power applications. Manufactured using high-temperature nylon and gold-plated spring contacts, it provides excellent conductivity, low resistance, and reliable long-term performance. In addition, the XT90 connector features a polarized design that prevents reverse polarity connection. As a result, it improves safety and protects connected batteries and electronic equipment from accidental wiring mistakes. Because of its robust construction, the connector can handle continuous currents up to 90A while maintaining a secure and stable electrical connection. Furthermore, the gold-plated contacts help reduce power loss and improve current transfer efficiency. The semicircular solder terminals simplify wire installation and support large wire sizes up to 8AWG, making the connector suitable for high-power applications. Moreover, the tight-fit design ensures a strong connection even in environments subject to vibration and movement. This XT90 connector set is widely used in RC aircraft,
